GOALS

Develop and progress Strategic and Operational Plan, including TMR endorsed program of works.

Establish QTLC as the 'go to' independent, freight and logistics advisory body for Queensland.

Representation is evidence based, recognises the integration of the freight network and adopts a whole of supply chain focus.

Transport asset owners and planners cooperate to reduce supply chain impediments, plan for, and invest in efficient freight infrastructure.

Government and industry priorities strategic investment, planning and policy decisions that benefit overall freight and logistics system performance and productivity.
